ADARSH M

Trivandrum, Kerala | adarshm.off@gmail.com | +91 8129265614 | linkedin.com/in/adarshmofficial | github.com/AdarshM-Official

PROFILE

Python/Django developer with practical experience integrating AI and machine learning into full-stack web applications. Comfortable across the stack — from SQL database design to RESTful APIs — with project and internship experience spanning SaaS platforms, ML-driven recommendation systems, and diagnostic models. Currently completing an MCA, looking to bring that blend of web development and applied AI to a product-focused engineering team.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, SQL, HTML5, CSS3
- Frameworks & Technologies: Django, Bootstrap, MVT Architecture, RESTful APIs, Machine Learning
- Databases: MySQL, MongoDB, SQLite, Oracle SQL, RDBMS
- Tools & Platforms: Git, GitHub, Visual Studio Code
- Emerging Technologies: Artificial Intelligence, Large Language Models (LLM), AI Tools
- Soft Skills: Communication, Team Collaboration, Problem Solving, Adaptability, Time Management

EXPERIENCE

AI Developer Intern Zecser Business LLP · May 2026 – August 2026

- Assisted in developing AI-powered application features, working with Python, APIs, and AI/ML tools.
- Supported backend development and AI integrations, collaborating with the development team on ongoing projects.
- Tested, debugged, and improved AI systems to strengthen reliability and performance.
- Contributed to code reviews and sprint planning sessions as part of an agile development process.

AI & Machine Learning Intern *Srishti Innovative · 2025*

- Developed a Breast Cancer Detection diagnostic model using Machine Learning techniques.
- Built data preprocessing and cleaning pipelines and applied feature engineering for improving model accuracy
- Evaluated the model using appropriate performance metrics and analyzed results to identify areas for improvement.

PROJECTS

Multi-College Personalised Management Platform *Python, Django, SQLite, HTML5, CSS3, Tailwind*

GitHub: AdarshM-Official/Multi-College-Personalised-Management-Platform

- Built an AI-powered, cloud-based education management platform with role-based portals, attendance tracking, scheduling, and student management features.
- Integrated chatbot support and automated timetable generation, applying AI-driven automation to a real-world backend system.
- Wrote Test cases, executed them and created test reports to ensure the quality and reliability of the project

MediReport AI *Python, Django, JavaScript, TailwindCSS, SQLite, Google Gemini API, LangChain, OpenCV*

Github : AdarshM-Official/medireport

- Built a Django-based clinical application that uses Google Gemini to parse and extract structured data from unstructured medical documents (PDF/Images).
- Developed an interactive patient dashboard featuring longitudinal health tracking and a real-time BMI/composition simulator using Vanilla JS and Tailwind CSS.
- Implemented server-side PDF generation using ReportLab to export AI-driven health analytics and clinical summaries.

BookingCloud – Multi-Tenant SaaS Booking Platform *Python, Django, SQLite, HTML5, CSS3, Tailwind CSS, JavaScript, AI, LLM , Voice Assistant Integration, Groq*

GitHub : AdarshM-Official/bookingcloud

- Developed a multi-tenant SaaS booking platform where businesses receive dedicated subdomain-based booking websites to showcase services, staff, availability, and accept customer appointments online.
- Built business dashboards with service and staff management, category-based service suggestions, tenant data isolation, and shareable booking URLs for customer acquisition and appointment management.

LearnLoop – Career Assistance Platform *Python, Django, SQLite, HTML5, CSS3, Bootstrap, Machine Learning*

GitHub : Nekha024/LearnLoop

- Built a career-guidance platform using Django and a Machine Learning model to recommend personalized career paths from user input.
- Designed a dynamic questionnaire system that analyzes responses and delivers tailored skill-development suggestions, integrating the ML model with the Django backend via internal APIs.
- Performed Unit testing and integration testing to examine the individual and cooperative working of the website

Farmie – Farming Assistance Web Service *PHP, HTML, CSS, JavaScript, PostgreSQL*

- Developed a full-stack agriculture management system to streamline farm operations, with a PostgreSQL-backed data layer.
- Built an Admin Panel to manage records and monitor user activity, improving data accessibility for administrators.

CERTIFICATIONS

- Data Science Using Python — Infosys Springboard, 2026
- Data Analyst Bootcamp Certificate — Udemy, 2025
- Software Development in Python — IT-ITeS Sector Skills Council NASSCOM, 2024

EDUCATION

Master of Computer Applications (MCA) *University of Kerala · 2024 – 2026 (Expected)*

- Relevant Coursework: Data Structures & Algorithms, Database Management, Web Architecture.

Bachelor of Computer Science *Kerala University · 2021 – 2024*
